

## Product Information

## MODIFIED STARCH MRE

---

Description: Off-white powder.

---

### Composition and

Application: Modified Starch MRE is a modified potato starch, readily soluble in fresh and salt water and is used to improve the Fluid Loss control of water base muds without increasing the viscosity.

---

### Specification

#### EVALUATION OF MODIFIED STARCH MRE

Property result	Unit	Required	Typical
AV in 4% salt water	mPa.s	9 max.	6
AV in saturated salt water	mPa.s	10 max.	7
FL in 4% salt water	ml.	10 max.	5
FL in saturated salt water	ml.	10 max.	5
Bulk Density	650 – 700 kg/m <sup>3</sup>		

---

Packaging: 25kg multiply paper bags
